

Elisa USA Latest Elisa Sculptures Have Smell of Success

Elisa, located near Barcelona, Spain, was established in 1965 as a workshop that produced fine-quality ceramic dolls. In the early 1980s, the firm made a dramatic shift in focus when award-winning Spanish sculptor and artist, Montserrat Ribes, was introduced to Elisa's owner, Alberto Roca.

Ribes recreates the human form in its never-ending range of moods and motions, drawing inspiration from her innate ability to be a keen observer of human nature. With a sense that is more highly attuned than others, she sculpts the emotions that the body can express — the tilt of a chin, the touch of a hand, or a tremulous smile — creating pieces of art from a simple mound of clay.

Inspired by real life moments, the Montserrat Ribes Collection

"Aroma"; by Montserrat Ribes; limited edition of 300; 17" tall.

offers individually signed and numbered, limited edition masterpieces that are fashioned from a proprietary stone product made exclusively by Elisa. The sculptures perfectly balance the harmony of color and form and enhance any décor with warmth, calm, and artistic beauty.

Two of the newest additions to this collection are "Sea Dreams" and "Aroma." A description or quote accompanies every Ribes sculpture, and these two are no exception. To describe "Aroma," Ribes says, "Like ivy adhering to the wall, the aroma of a memory adheres to our mind forever."
